EDUCATION BACKGROUND

Zhejiang University 09/2025 – Present
PhD candidate
Major: Foreign Linguistics and Applied Linguistics

City University of Hong Kong 09/2024 – 06/2025
Master of Arts (with Distinction)
Major: Language Studies (General Linguistics stream)
GPA: 3.59/4.30

Capital Normal University 09/2020 – 06/2024
Bachelor of Arts (completed the Honors Program)
Major: Chinese International Education
GPA: 4.01/5.00 (90.1/100)

PUBLICATIONS AND PRESENTATIONS

2025

On the Argument Structure without Overt Predicate in Nominal Phrases
Sole author
Presented at the 11th International Conference on Formal Linguistics (ICFL 11), November 2025.

Semantic and Syntactic Study of the Separable Potential Complement Construction in Yanshan Dialect
《铅山方言隔开式能性述补结构的语义和句法研究》
Second author, with Zhouxin WU
Presented at the Doctoral Forum of the Department of Foreign Languages and Literatures, Tsinghua University, May 2025.

2024

On the Grammaticalization and Semantic Evolution of Ji in Archaic Chinese

《試析“幾”字的語義演變與語法化——從〈莊子・逍遙遊〉談起》

Sole author

Presented at the 2024 Doctoral Conference on Chinese as a Foreign Language, Peking University, May 2024; published in the conference proceedings.

DOI: 10.26914/c.cnkihy.2024.010283

SUMMER SCHOOL

Linguistics Institute of China

07/2024 – 08/2024

Excellence Award, Core Course Program

Full marks in syntax

Linguistics Institute of China

07/2025 – 08/2025

Advanced Seminar Program in Children's Language Acquisition

ACADEMIC EXPERIENCE

Biolinguistics and Brain Sciences Laboratory

Beijing Language and Culture University

06/2022 – 06/2024

Research Assistant

Supervisor: Prof. Si Fuzhen

Project: On Language Acquisition and Cognition from the Perspective of Syntactic Cartography

Main work: Designed and conducted neurolinguistic experiments using electroencephalography (EEG), and analyzed experimental data to study adjective hierarchies.

Institute of Information Engineering

Chinese Academy of Sciences

06/2021 - 11/2021

Research Assistant

Supervisor: Prof. Wang Xuren

Project: Knowledge Graph Construction for Natural Language Processing Based on Convolutional Neural Networks

Main work: Performed relational triple extraction (RTE) and named entity recognition (NER).

RESEARCH INTERESTS

My research focuses on formal syntax, Distributed Morphology, and formal semantics within the Minimalist Program.

The work I am currently engaged in primarily involves syntactic research on cross-linguistic possessive/genitive structures represented by the Chinese *de* structure within the DP framework, as well as research on argument structures within the DP.

HONORS & AWARDS

2022, 2023

Capital Normal University Scholarship Award.

2022

Analysis of Social Platform Corpus Based on Deep Learning

First Prize, Capital Normal University Comprehensive Quality Improvement Research Fund; Project Leader.

2023

Yin-Yang-Ru Rhyme Alternations in Old Chinese

Excellence Award, Capital Normal University Laboratory Open Fund; Project Participant.
